

UTS1004 UIP

KO 2039

Delphi Euro-6 F2e Series Pumping & Non-pumping Injector Test Kit

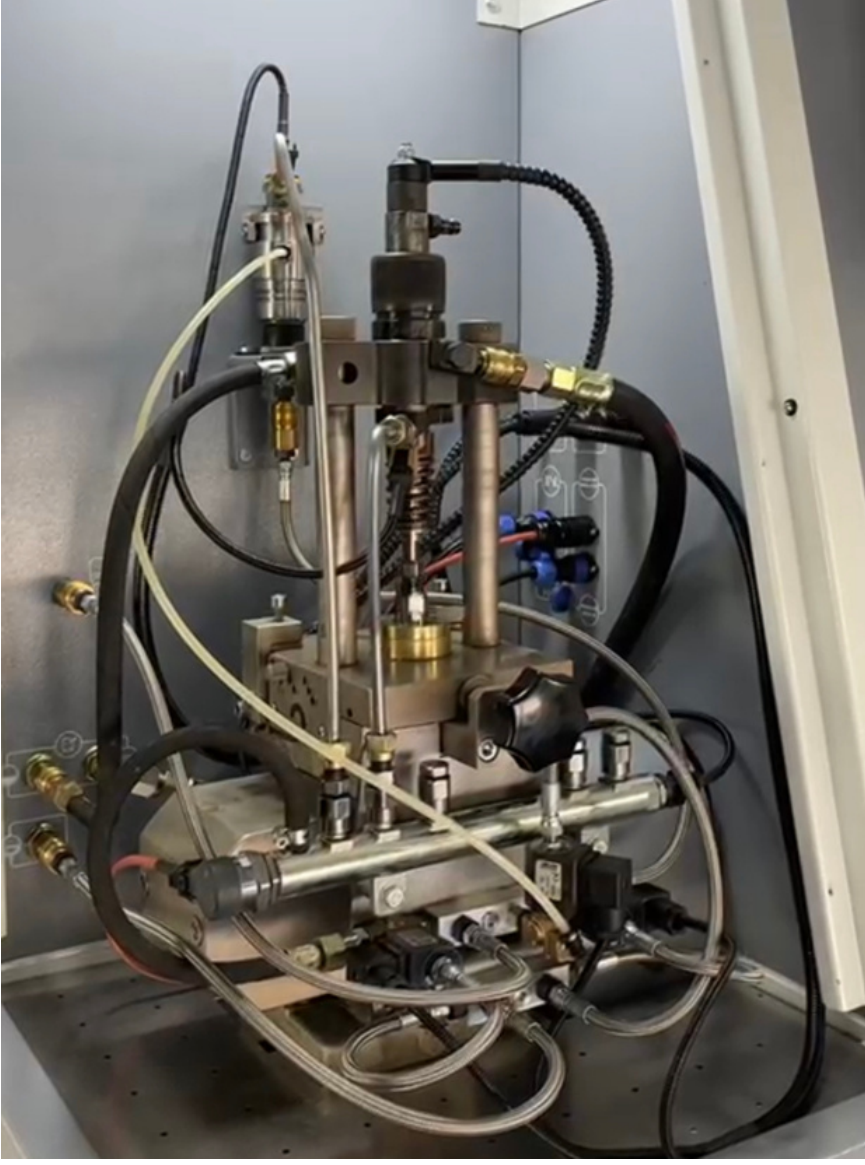

KO2039 is delivered together with the F2e adapter sleeve for the pumping injector and the F2e adapter sleeve for the non-pumping injector, complete for testing the F2e system in one setup.

UTS1004 is the first choice of the hundreds of Fuel Injection Specialists around the world.

UTS1004 can test the Injector Delivery and Return flow of the F2e Non-Pumping Injector.

UTS1004 can test the total delivery amount, and injected delivery amount nozzle response time (NRT) of the F2p pumping injector.

KO2039 has a high-pressure rail that can control pressure up to 2200 bar.

UTS1004 can test the total delivery amount, and injected delivery amount nozzle response time (NRT) of the F2e pumping injector.
